

Water for the Environment

Key Achievements: 2024-25

948,047 ML
Delivered to the environment

This volume was delivered across Victoria by program partners, including the VEWH, Commonwealth Environmental Water Holder (CEWH), and The Living Murray program

168
Rivers reaches & wetlands watered

Environmental water coordinated to benefit 168 distinct river reaches and wetlands, supporting a wide range of Victorian ecosystems

88%
of all potential actions achieved

The percentage of potential watering actions that were fully or partially achieved

59%
Water re-use & efficiency

Portion of environmental flows strategically re-used to meet downstream needs, often 'piggybacking' on water delivered for towns and farms for most impact

23
Partnerships with Traditional Owners

Watering activities planned and/or delivered in partnership with Traditional Owners, helping to heal Country and support cultural objectives

100%
Support for top fishing spots

All 28 of Victoria's top recreational fishing river reaches that can receive environmental flows were watered this year, supporting healthy fish populations

A Collaborative Effort: Over 250 program partners and stakeholders contributed to planning environmental flows
