

Outcomes and achievements: reflections on 2025-26

826,322 ML

The VEWH oversaw delivery of 826,322 megalitres of environmental water.

175

The VEWH coordinated delivery of water for the environment to 175 lakes, rivers and wetlands in Victoria.

5 Ramsar sites

All five targeted Ramsar sites that can receive water for the environment were watered, with Hattah in a drying phase.

89%

89% of required potential watering actions were partially or fully achieved.

72%

72% of environmental flows delivered in northern Victoria were re-used to meet environmental water needs.

30

30 environmental watering actions in six systems were planned in partnership with Traditional Owners.

100%

100% of Victoria's top 28 recreational fishing river reaches that can receive environmental flows were watered this year.

250

At least 250 stakeholders and program partners contributed to planning for environmental flows.
